PATENTAmendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

Claims 1.-41. (canceled)

Claim 42. (currently amended) A method of displaying contact information for a plurality of individuals to a subscriber of contact information, the method comprising:

receiving one or more information relating to two or more communication networks
network addresses for capable of being used by an individual a plurality of individuals;

generating a plurality of summary availability indicator for the individual indicators for
the plurality of individuals, wherein each the summary availability indicator indicates different
types of data that each individual is capable of receiving or indicates different communication
network types that each individual is capable of using;

wherein for each type of data, the summary indicator indicates whether or not the
individual is present and available to receive the type of data, or for each communication
network type, the summary indicator indicates whether or not the individual is present and
available to communicate on the communication network type summarizes the two or more
communication networks by indicating that the individual is present and available to a subscriber
if the individual is present and available on at least one of the communication networks, and by
indicating that the individual is not present and available if the individual is not present on any of
the communication networks; and

displaying the plurality of summary indicators summary availability indicator to the
subscriber, and

wherein the individual is present if the individual has access to a particular
communication network type and the individual is available if the individual willing to be
contacted by the subscriber.
